SYNTHETIC TEST DOCUMENT

NOT A REAL CERTIFICATE OR STUDENT RECORD

VERSION 2

Test identity	Synthetic Student A
Test registration	EVAL/001
Purpose	Private document filing evaluation
Visible revision	Replacement test content - revised version

This file contains invented information only. Use it to check upload, private retrieval, approval, rejection and retained document history in the isolated evaluation site. It does not certify birth, examination performance, clearance, state of origin or any personal status.

The same test file may be uploaded under each of the six required document categories to verify category handling. That checks the filing software; it is not a test of the authenticity or semantic content of a real departmental document.

Expected visible content: version 2. Record whether the correct version is downloaded before and after replacement approval. Keep the previous approved file accessible in its archive.
